

HOW ARE WE PROTECTING YOU AT OXFORD FAMILY DENTISTRY?

We are:

- Following all current health guidelines (ADA, MDA, CDC, OSHA and Health Department)
- Screening (questions and temperature checks) all employees and patients for COVID- 19 virus symptoms
- Maintaining physical distancing and wearing masks as appropriate
- Reducing infection risk by removing magazines and toys from the reception area
- Requiring hand sanitizing for all patients and employees
- Using air filtration in individual rooms (HEPA and UV-C) as well as central air purification

Dr. Tahaney and hygienists, in addition to air filtration, will use the following to reduce/eliminate the generation of aerosols:

- Hydrogen peroxide pre-rinses prior to dental treatment
- Teeth will be cleaned without water spray method, and will use paste-less polishing after cleaning
- High volume, in the mouth suction when appropriate
- Private patient rooms with Kleenex and hand sanitizer provided
- Wear face shields and surgical masks or N95 respirators
- State-of-the-art extra-oral vacuum units
